JULY 2026 – Ongoing Development

- **Technologies:** AWS S3 ■ CloudFront ■ IAM ■ HTML ■ CSS ■ JavaScript ■ Git ■ GitHub
- Designed and developed a responsive personal portfolio website using HTML5, CSS3, and JavaScript.
- Deployed the static website on Amazon S3 and configured Amazon CloudFront for secure, low-latency global content delivery.
- Configured AWS IAM permissions and S3 bucket settings to support secure and reliable website hosting.
- Managed source code using Git and GitHub, enabling version control and structured project development.
- Applied cloud computing concepts including static website hosting, content delivery, cloud security, and scalable web deployment.
- Designed the project as a foundation for future enhancements including serverless visitor analytics, custom domain integration, HTTPS, and CI/CD automation.
